

David Rodriguez

I'm a self-starter and problem solver with 7+ years of experience in business operations, product design, and front-end development. I build responsive, user-friendly web apps using JavaScript, React, HTML, CSS, and Shopify's Liquid. I enjoy learning and staying current with evolving tech trends.

Experience

Front-end Developer • UFP Industries, Grand Rapids, MI

May 2024 - present

- Develop custom tools and interactive features within Shopify using JavaScript and Liquid, translating designs from Figma into seamless, branded store experiences.
- Ensure responsive, intuitive components that perform smoothly across all devices and maintain accessibility standards.
- Collaborate closely with designers and fellow developers to transform ideas into clean, user-friendly interfaces.
- Investigate and resolve bugs and performance issues, optimizing code to support efficient, scalable growth.
- Conduct thorough code reviews, improve team workflows, and promote best practices for reliable, maintainable solutions.

Career Coach • Sparta Schools Adult Education, Grand Rapids, MI

Sept 2019 - April 2024

- Coached over 100 students in career skills and English, significantly improving their confidence and communication abilities.
- Created personalized learning plans, reducing student dropout rates by 65%.
- Monitored progress with data-driven methods, refining lessons to enhance student outcomes.
- Simplified complex topics to make learning approachable for a diverse student population.

Small Business Owner • BlueWood, Grand Rapids, MI

Sept 2017 - Dec 2023

- Launched and scaled a woodworking business, adapting strategies to meet changing market trends and customer preferences.
- Designed and managed an engaging Etsy storefront, improving customer experience with strong visual appeal.
- Tested and explored Shopify for future growth, gaining practical skills with CSS, JavaScript, and Liquid.
- Created detailed 3D product mockups using Blender, increasing customer satisfaction and boosting sales.
- Executed targeted advertising campaigns and leveraged Google Trends, achieving a 350% increase in brand visibility and sales.

Software Engineer • Struct. Lab-National University of Colombia

Aug 2015 - May 2017

- Developed real-time data collection systems for seismic research, integrating NI-DAQ hardware with LabVIEW software.
- Evaluated third-party software versus custom solutions, helping the lab reduce expenses by 65%.
- Collaborated directly with researchers to troubleshoot technical issues, turning complex requirements into effective, working prototypes.
